DESIGN | BUILD | BEYOND

Willmar Electric is accepting applications for Industrial Maintenance Technicians:

Lawton, OK.

Apply online: <https://willmarelectric.com/careers/>

Wage Range: \$17.50 – 24.00/Hour (DOE)

Job Summary:

Maintains production and quality by ensuring operation of machinery, consisting of mechanical and electrical equipment.

Maintenance Technician Job Summary

Searching for multi-trade maintenance technicians to join our team. In these positions, they will be responsible for industrial machinery upkeep, working alone or with a crew. They must be well-rounded individuals who can perform efficient work on a variety of equipment, executing mechanical, hydraulic, pneumatic, and electrical maintenance.

Maintenance Technician Requirements and Qualifications

- Certificate or diploma in a related field (Preferred not required)
- Completion of an industrial maintenance apprenticeship program is a plus
- Corrective/breakdown experience with Industrial maintenance preferred
- Knowledge of industrial equipment, its usage, and safety procedures
- Self-motivated, responsible and Safety Oriented individual.
- Learns and applies standard tools and techniques to solve problems.
- Demonstrates a positive “can-do” attitude.
- Takes responsibility for self-performance (Ability to manage time and responsibilities independently).
- Contributes to team effort by accomplishing results and meeting expectations.

- Flexibility - Possibly rotation shift work, taken case by case.

Industrial Maintenance Technician Job Duties

- Ensures operation of machinery and mechanical equipment by completing preventive and corrective maintenance requirements. Equipment includes motors, gearboxes, pneumatic systems, coupling and motor alignment, roller chain/sprockets alignment, conveyor systems, and production machines. Capable of following diagrams, sketches, operations manuals, manufacturer's instructions, and engineering specifications.
- Locates sources of problems by observing mechanical devices in operation and listening for problems.
- Removes defective parts by dismantling devices; using hoists, cranes, and hand and power tools. Strong welding skills are preferred.
- Determines changes in dimensional requirements of parts by inspecting used parts using rules, calipers, micrometers, and other precision measuring instruments.
- Adjusts functional parts of devices and control instruments by using hand tools, levels, and alignment equipment.
- Controls downtime by informing production workers of routine preventive maintenance techniques.
- Optimizes maintenance resources by using equipment and supplies as needed to accomplish job results.
- Maintains continuity among work teams by documenting actions, communicating irregularities, and scheduling correction of abnormalities.
- Maintains a safe and clean working environment by complying with procedures, rules, and regulations.
